PROJECTS

- ❖ **Steelnow.com:** The development team and I collaborated together to create an e-commerce friendly website for our company and marketing team. Using agile methodology we were able to build this product within a short period of time, with fully functioning slack and email integration that informs our marketing team when a quote is produced online and someone is interested in buying one of the many products we have available. <https://steelnow.com/>
 - **Technologies:** For front end HTML, CSS, and Bootstrap was used as well as Javascript and JQuery to help with animation and other features. *Backend* consisted of PHP and our in house framework, while we used MySQL and GCP for cloud storage and efficiency.
- ❖ **PastQuest:** This project was my first attempt at understanding the Ruby On Rails MVC Framework and how backend and frontend work together simultaneously to create a fully functioning app we see on the web today. <https://pastquest.herokuapp.com/> (please use email: tts@yahoo.com password: testing1234)
 - **Technologies:** For front end HTML, CSS, and Bootstrap was used as well as a little Javascript. *Backend* and database storing consisted of Ruby, and Postgres which is standard when pushing apps to the Heroku platform.
- ❖ **Count It Down:** This project was a small task I decided to take on to help myself better understand Javascript and the magical powers it has when working with DOM manipulation. <https://github.com/devery512/CountDownTimer>
- ❖ **Doneltt:** This project was a part of my time in the Tech Talent South Select Program. In a team of three we worked together to publish web application used for writing down task one may need to get done. <https://github.com/devery512/FinalProject>
 - **Technologies:** In this project we used Springboot and the SpringMVC to develop an application that takes in data and stores it as a Task as well as use the CRUD functions to manipulate that data and have it be presented back to the client.

SKILLS

- ❖ **Programming/Languages:** Object Oriented Programming - PHP, Java, Ruby; *Front End Technologies* - HTML, CSS, Javascript; *Backend Frameworks* - Node.JS, Springboot, Ruby On Rails;
- ❖ **Database Management:** Hibernate, Relational Database - MySQL
- ❖ **Design & IDE Tools:** Sublime, Eclipse, MVC Framework - SpringMVC, Rails MVC;
- ❖ **Development Tools:** Git/Github, Google Cloud Platform, Cloud Foundry, Heroku
- ❖ **Systems:** Windows, Mac OS, Git/Github, Linux/Unix
- ❖ **Soft Skills:** Communication, Critical Thinking, Customer Service, Pair Programming, Problem Solving, Desire to Learn, Self Taught, Agile Mythologies;

EXPERIENCE

STEELNOW— Dallas, TX

Junior Web Developer, Current Position

As a junior developer I work as part of a team including a Senior Full-Stack Engineer, a Senior Data Scientist and another developer swell as a project manager where I am given task to complete and present at the end of each sprint.

- ❖ Write well designed, testable, efficient code by using the best software development practices while being a part of a fast paced startup culture using agile methodologies.
- ❖ Create marketing e-commerce website UI/UX by using standard Frontend practices HTML, CSS, and Vanilla Javascript. As well as integrate data from various back-end services and databases using PHP and MySQL.
- ❖ QA Test the development team's work to insure it is up to scale with the rest of the current code base.
- ❖ Gather and refine specifications and requirements based on technical needs at the end of each sprint. Write and maintain software documentation.
- ❖ Responsible for maintaining, expanding, and scaling the companies software across a variety of platforms while cooperating with the design team to match visual design and user experience intent.

TECH TALENT SOUTH— Dallas, TX

Assistant Full-Stack Instructor, 2018 to 2019

When given the opportunity, I accepted a position to be a TA for a part time coding immersion program hosted by Tech Talent South.

- ❖ This course covered Frontend technologies html, css, and vanilla javascript, as well as data manipulation using Ruby and its MVC Framework Ruby On Rails to build full-stack web applications.
- ❖ Helped students understand the material that the class was going over during the 8 week coding program as well as help the instructor test students on their knowledge.
- ❖ Helped to debug and troubleshoot students programming homework and projects.

KROGER — Bartonville, TX

Clicklist Associate, 2017 to 2018

Greeted customers when they arrive to pick up their items as well as help load items into customers cars:

- ❖ Resolved Issues with unsatisfied customers while maintain excellent customer service to those in need of a helping hand. Trained new employees on opening and closing procedures that must be followed when opening or closing the department.

ACADEMY SPORTS & OUTDOORS — Dallas, TX

Logistics Lead, 2015 to 2017

Help train new employees as well as conduct daily schedule/Task for each employee:

- ❖ Unloaded truck then sort and set new planograms for the week. Perform daily stock and outs report while given excellent customer service on the sales floor.
